SENIOR CONSULTANT (m/f/d) Metals Supply Chain Management

OUR OFFER

You want to take on responsibility, help shape the topics you work on and contribute to your team's success? Also, you want to enjoy flexible working conditions and you are looking for a good atmosphere in the office? Then we are the company for you!

We, Bronk & Company GmbH, are a young, innovative and expanding team of consultants focusing on supply chain management in the metals industry.

Our experts at B&C have a lot of experience in managing projects and bringing them to a successful closure. We are a strong team with a variety of professional backgrounds and we accompany and support our clients in transforming their value chains and increasing their efficiency.

To further strengthen our team in Aachen (Germany), we are offering a position as Manager.

YOUR TASKS

- You autonomously plan, manage and lead (partial) projects including budget responsibility
- You participate in the project from the initial potential analysis to the benefit-oriented realization, producing and adding new ideas and contributing to the overall success of the project
- You use your experience in a focused manner when analyzing and evaluating customer-specific data
- You independently document the results and present these in customer workshops and in presentations at top management level
- You contribute to the (further) development of our solution approaches and our product portfolio

SENIOR CONSULTANT (m/f/d)

Metals Supply Chain Management

YOUR RESPONSIBILITIES

- Above-average degree (preferably in industrial engineering, economics, business information science, metallurgy or similar)
- Practical and leadership experience in supply chain management, ideally in the metals industry
- Ideally, consulting experience in strategy, supply chain management, organizational restructuring and operative performance management
- Confident demeanor and experience in moderating and presenting
- Well-versed in the use of common MS Office programs
- Ideally, experience with BI tools and SAP
- Analytical mind-set and experienced in the analysis and interpretation of large data volume
- Ability to work in a team and interested in supply chain-related topics
- Willingness to travel (also internationally)
- Willing and motivated to take on responsibility

YOUR PROSPECTS

- Exciting and challenging industrial projects
- Opportunities for personal development, as well as individually aligned further training opportunities in both professional and more general topics
- Team spirit and good working atmosphere with a flat hierarchy
- Secure job with opportunities for further development
- Balanced ratio of travelling, office and home office time
- Above-average remuneration (fixed salary with attractive variable component)
- Access to corporate benefits, such as fitness / health programs and team events
