## CONSULTANT (m/f/d) Metals Supply Chain Management

### OUR OFFER

Do you want to take on responsibility fast and shape projects with your contribution to your team's and customers' success? Do you want to use your knowledge from your studies, internships and on-the-job experiences in your next project challenges? Do you appreciate flexible working conditions and are looking for a positive atmosphere in the office? Then we are the company for you!

We, Bronk & Company GmbH, are a young, innovative and expanding team of consultants focusing on supply chain management in the metal industry.

Our experts at B&C have a high level of experience in the management and successful completion of projects. We are a strong team with a variety of professional backgrounds, and we facilitate and support our clients in transforming their value chains and increasing their efficiency.

To strengthen and expand our team in Aachen (Germany), we are offering a position as Consultant.

### YOUR TASKS

- As member of our project teams you advise our clients in the transformation of their supply chain
- You work independently on defined work packages and accompany our clients in all project phases – starting from the analysis of potentials all the way until the successful implementation
- As such, you will be thoughtfully assigned by our project leaders and quickly take over responsibility for important tasks and you will present the results within the team as well as to our clients
- You apply your acquired methods and practical experiences in the analyses of data and processes with a high level of precision and efficiency
- With our assistance you prospectively take the lead in partial projects
